Yachtcenter

Joined Forces

Almost 150 years of joint experience, knowledge and especially the love for beautiful and solid motor yachts has led to a special connection between the Norwegian Nidelv yard and Smelne Yachtcenter. The result: the Nidelv 950 S-line!

Smelne took over the moulds of this solid motor yacht from a Norwegian colleague and subsequently developed a completely renewed motor yacht in consultation with the Nidelv yard.

As a result of the collaboration, this tried-and-tested model has been given a complete overhaul for today's modern way of sailing, with safety and comfort in mind.

Easy to open and close full-cabrio canopy for comfortable sailing in all weather conditions.

Unlimited sense of freedom

Due to the unique seaworthy underwater ship for a clinker hull shape, this Nidelv 950 S-line is also extremely suitable for coastal waters with an extended range.

Among other things, the open cockpit gives the Nidelv 950 S-line a feeling of space and freedom for that optimal water sport experience. The helm is well positioned to guarantee a free and wide view all around.

The Nidelv 950 S-line is a GRP motor yacht that is very pleasant to cruise, both at low and higher speeds (14 knots). The clinker hull shape and spray rail in particular have contributed to this.

Proven quality and contemporary innovation

The characteristic classic Scandinavian origin is intertwined with modern insights and materials in the Nidelv 950 S-line. This gives the motor yacht its own look and atmosphere.

All applied parts and materials are completely modern! The motor yacht is powered by a robust 110 hp Yanmar engine. The Nidelv 950 S-line is standard equipped with a bow thruster, ceramic hob, boiler, electric toilet, all lighting in LED and many stainless steel details.

The well-considered layout of the Nidelv 950 S-line also shows that all the experience from two renown marine builders comes together in this model. The motor yacht offers a sea of living space and comfort, and at the same time it has countless cleverly thought-out storage spaces.

The front cabin of the Nidelv 950 S-line is very spacious. A convenient hand shower is available in the sanitary room that saves space. In addition, a deck shower is available on the bathing platform.

A century of craftsmanship

The Nidelv yard in Bjorbekk, located in the south of Norway, has a rich history. Nils Nilsen started building wooden rowing fishing boats in 1911.

Nil's craftsmanship and good name were doing the rounds more and more, which translated into an ever-increasing demand in Norway and neighbouring countries.

Partly under the influence of his 4 sons who joined the company, the major switch to GRP was made in the 1960s. During that time, the yard also moved to its current location, on the river Nidelva. From then on, the brand name Nidelv was born.

No one could have predicted the success that this brand would take. In the meantime, thousands of Nidelv motor yachts have been built and have found their way to the very satisfied and proud water sports enthusiasts in a large number of European countries.

The family business will be 100 years old in 2029!

Nidelv 950 S-line

CE classification	C
Length over all	9.46 m
Width over all	3.30 m
Draft	0.82 m
Air Draft	2.31 m/2.90 m
Headroom	+/- 1.90 m
Displacement	ca. 3.750 kg
Hull shape	Spithole
Stainless steel keel sole (protection rudder and propeller)	X
Engine	Yanmar, 110 hp
Dynamo	125 Amp.
Engine control	Single
Stainless Steel water lubricated propeller shaft	Ø 40mm
Propeller 4 Blade	X
Steering	Hydraulic
Exhaust system plastic	X
Oil collector under engine	X

Technics

Maintenance-free propeller shaft installation	X
Engine water filter, easy to access	X
Aluminum anodes	2
Nidelv engine room insulation package	X
Double pole electrical system	X
Main switch for start, service and bow thruster	X
Emergency main switch (parallel switching start and service batteries)	X
Shore power 220 Volt with 30 Amp charger and 3x 220 Volt socket	O
Shore power 220 Volt with 50 Amp charger/1.200 Watt inverter and 3x 220 Volt socket	O
Maintenance-free batteries 3x 115 Ah; 2x consumer/1x engine	X
Extra 220V sockets	O
220V waterproof socket	O
12V socket	X
Power supply display	O
Bow thruster tunnel	X
Bow thruster	60 kgf
Stern thruster	O
Aluminum water tank with inspection cover	250 liters
Automatic drinking water system	X
Boiler 30 liters	X

Aluminum diesel tank with inspection cover	290 liters
Emergency shut-off valve between diesel pipes	X
Diesel pre-filter, easily accessible	X
Aluminum waste water tank	85 liters
Electric waste water pump	X
Hot air heating (2 kW) with outlets	O
Environmentally friendly automatic fire extinguisher in engine room	X
Shower drain tank with pump	X
Drinking water pump	X
Electric bilge pump with automatic level switch	1
Manual bilge pump mounted in engine room	X

Windows and stainless steel

Windows with Securit safety glass	X
Tinted windows	X
Modern flushline windows	X
Windshield with clear tempered glass	X
Flush mounted escape hatch on foredeck	X
Blackout and mosquito screen built into ceiling	X
Polished stainless steel railing with intermediate tube	X
Polished stainless steel handrail on forward cabin roof	X
Polished stainless steel bollards	6
Polished stainless steel bathing platform with teak platform	X
Polished stainless steel anchor a/o bow roller options	O
Polished stainless steel folding swim ladder	X
Teak steps on bathing ladder	X
Polished stainless steel air intake grilles	X

Interior

The Nidelv 950 S-line is built by Norwegian craftsmen in the traditional way of hand laminated to a high standard. The modern window and color styling has given the ship a modern classic look. The many years of tried and loved layout has once again been the starting point for this new Nidelv 950 S-line series.	X
Layout, style as exhibited	X
Interior in teak or cherrywood	X

White vinyl between the windows	X
Mirror in wooden frame in sanitary room	X
White ceiling panels with lighting	X
Chrome LED ceiling lighting	2
Chrome reading lamps with USB charging point, in front and aft cabin	X
Countertop made of synthetic material	X
Worktop in sanitary room made of synthetic material	X
Chrome push button closure for the cabinet doors	X
HPL teak floor in front and aft cabin	X
Round seat in the front cabin can be converted into a sleeping place	X
Compressor refrigerator, approx. 65 litres	X

100 liters of diesel upon delivery	X
Transport Norway - Drachten	X

The easily walkable gangways are equipped with a safe stainless steel railing. Unique for a motor yacht of this size.

Aft cabin with double bed has plenty of wardrobe space.

By lowering the height-adjustable table, a spacious (sun) bed can be created.

The cosy U-shaped seating area offers two additional berths in no time at all.

Everything in-house

Smelne Yachtcenter has its roots in steel yacht building for over 54 years. More than 1.500 cruisers and Vlets have been launched from our shipyard. The company has not stood still and has made a name for itself as an all-round Boating Centre.

In addition to building motor yachts, Smelne Yachtcenter also plays an important role as a yacht broker. A large number of ships change ownership through our brokerage every year. Not only various brands of steel yachts, but also GRP ships, large and small. Our new and spacious showroom and under-covered floating marina make The Smelne Yacht Center an excellent partner for both seller and buyer alike.

The Smelne Yacht Centre can offer the A-Z for all of your boating needs. Our Maintenance & Repair department offers servicing, lifting, full major refits as well as custom built Steel and Aluminum Motor Yachts.

Smelne Yacht Center - Haines Motor Yacht dealer for the Benelux and Germany.
