Description

Classic and robust model vlet with nautical interior. Well maintained and ready to go!

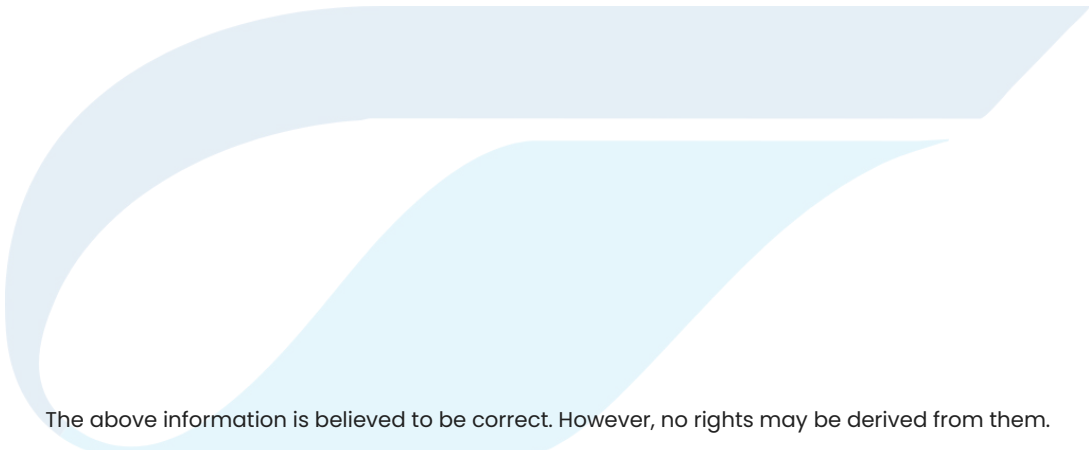

This IJlster vlet is easily accessible thanks to the lower freeboard and wide gangways with stainless steel railing and several stainless steel handrails all around. The open cockpit can be reached from the gangways. The open cockpit is equipped with a cockpit bench with plenty of storage space inside and under the cockpit floor. The canopy provides shelter in all weather conditions.

On the same level as the open cockpit is the salon. The salon is arranged with a comfortable L-shaped saloon settee with a cabinet wall and inside steering position opposite. From the inside steering position you have a good view all around and raise the mast at the push of a button. The classically shaped windows all around provide pleasant light and the various windows that can be opened provide optimal ventilation options.

In the bow, one level down, the kitchen is located in open connection with the saloon. Opposite is a spacious sanitary room with toilet and wash- / shower facilities. The forward cabin has a spacious V-berth and ample closet and storage space.

This IJlster vlet gives a well-kept impression and has been completely repainted during winter 2022/2023. There are also 2x 95W solar panels with Victron Blue Solar Charger MPPT 70|15 charge controller and Victron battery monitor.

In other words, this IJlster vlet is ready for departure to make many beautiful trips.
